

**INTERIM REPORT OF THE
OPTN/UNOS AD HOC DISEASE TRANSMISSION ADVISORY COMMITTEE**

December 8, 2011

The OPTN/UNOS Ad Hoc Disease Transmission Advisory Committee (DTAC) met via teleconference on December 8, 2011, and considered the following items.

1. The Committee received a brief overview of a meeting held in Richmond on November 18, 2011, for DTAC leadership and support staff to plan for future committee goals and more efficient processing of reported potential donor derived disease transmission events. New case management software is being developed internally to help streamline the case intake process.
2. Committee members were notified of an upcoming opportunity to present abstracts at NATCO's 37th annual meeting, scheduled for August 12-15 in Washington D.C.
3. The Committee reviewed 15 potential donor-derived disease transmission events reported to the OPTN. Tentative classifications were assigned to each.
