

**INTERIM REPORT OF THE
OPTN/UNOS OPERATIONS AND SAFETY COMMITTEE**

August 22, 2012

The Operations and Safety Committee (OSC) met on August 22, 2012 via LiveMeeting teleconference to consider the proposed Policy Rewrite released for public comment on July 2, 2012.

UNOS staff reviewed with OSC the goals of the rewrite, new features of the document, significant changes in the look and feel, and next steps in answering public comment feedback before Board consideration of the proposal in November 2012.

After an overview of the proposal, the Committee reviewed each of the 18 policies. The review focused on usability of the new policy structure and to provide feedback on changes in language that may not have maintained the policy's intent. Members agreed that the proposed document is easier to navigate and is user friendly. It was discussed that the policy change history section was thought to be extremely helpful for historical perspective and understanding of when policies were implemented. The committee also commented numbering and terms that should be used consistently throughout the document for clarity of its content.

Next 2012 Meeting Date – The full Committee will meet again on September 13, 2012 at O'Hare Hilton Hotel, Chicago, Illinois.
