

## List of Tables in the Chapters of the 2008 OPTN/SRTR Annual Report

### **Chapter I: Trends in Organ Donation and Transplantation in the United States, 1998-2007**

|                           |   |
|---------------------------|---|
| <a href="#">Table I-1</a> | Growth in Number of Transplanted Organs, 2006-2007      |
| <a href="#">Table I-2</a> | Growth in Number of Recovered Organs, 2006-2007         |
| <a href="#">Table I-3</a> | Patients on Waiting Lists, 2006-2007                    |
| <a href="#">Table I-4</a> | Unadjusted One- and Five-Year Patient Survival by Organ |
| <a href="#">Table I-5</a> | Unadjusted One- and Five-Year Graft Survival by Organ   |

### **Chapter II: Organ Donation and Utilization in the United States, 1998-2007**

|                            |   |
|----------------------------|---|
| <a href="#">Table II-1</a> | Best Practices  |
| <a href="#">Table II-2</a> | Unadjusted Percentages of Recovered Kidneys that were Discarded, Based on OPO Pumping Practices |
| <a href="#">Table II-3</a> | Changes in DCD and DBD utilization within DSAs, 2006 to 2007                                    |
| <a href="#">Table II-4</a> | TJC Standards   |
| <a href="#">Table II-5</a> | CMS COP Components  |

### **Chapter III: Kidney and Pancreas Transplantation in the United States, 1998-2007: Access for Patients with Diabetes and ESRD**

|                             |  |
|-----------------------------|--|
| <a href="#">Table III-1</a> | Annual Number and Distribution of Kidney Waiting List Patients by Patient Characteristic and Status at Year-end, 1998-2007   |
| <a href="#">Table III-2</a> | Unadjusted Graft and Patient Survival at 5 Years among Deceased Donor (non-ECD and ECD) and Living Donor Kidney Transplant Recipients, 1994-1999 and 2000-2005   |
| <a href="#">Table III-3</a> | Change in the Percentage of Patients with Diabetes among Wait-listed Adult Kidney-Alone Candidates by Race, from 1998 to 2007  |
| <a href="#">Table III-4</a> | Number of Patients aged 0-75 years with Diabetes as the Primary Cause of ESRD: a) Beginning Dialysis, b) Preemptively Wait-listed, and c) Receiving a Preemptive Living Donor Kidney Transplant Who Were Never Wait-listed |
| <a href="#">Table III-5</a> | Allocation Outcomes of Study Population by Entry Criterion: Patients with Diabetes Aged 0-75 Years Whose First ESRD Treatment Was During 1998-2006   |
| <a href="#">Table III-6</a> | Allocation Outcomes by Entry Criterion: Patients with Diabetes Wait-listed for SPK Transplantation Aged 0-75 Years Whose First ESRD Treatment Was During 1998-2006   |
| <a href="#">Table III-7</a> | Percentage of Patients with Diabetes (by Age) Placed on the Kidney Waiting List and Receiving a Transplant by State, 1998-2006   |
| <a href="#">Table III-8</a> | Between-State Correlation coefficients (r) for Outcomes in Table 7   |

### **Chapter IV: Liver and Intestine Transplantation in the United States 1998-2007**

|                            |   |
|----------------------------|---|
| <a href="#">Table IV-1</a> | Liver Waiting List Candidates (Active at End of Year) by Diagnosis, 1998-2006   |
| <a href="#">Table IV-2</a> | Liver Deceased Donor Transplant Recipients by Diagnosis, 1998-2006  |
| <a href="#">Table IV-3</a> | Liver Living Donor Transplant Recipients by Diagnosis, 1998-2006  |
| <a href="#">Table IV-4</a> | Liver Transplants Using DCD Donors and Number of Liver Transplant Programs that Performed DCD Liver Transplants by Year (1/1/2000 to 12/31/2007)* |
| <a href="#">Table IV-5</a> | Donor Characteristics by Deceased Donor Type (DCD vs. DBD) (1/1/2000 to 12/31/2007)*  |
| <a href="#">Table IV-6</a> | Recipient Characteristics by Deceased Donor Type (DCD vs. DBD) (1/1/2000 to 12/31/2007)*  |
| <a href="#">Table IV-7</a> | Transplant Characteristics by Deceased Donor Type (DCD vs. DBD) (1/1/2000 to 12/31/2007)*   |

|                             |  |
|-----------------------------|--|
| <a href="#">Table IV-8</a>  | Distribution of MELD/PELD Score at Transplant by Deceased Donor Type (DCD vs. DBD) (9/1/2001 to 12/31/2007)                            |
| <a href="#">Table IV-9</a>  | Risk of Graft Failure by DCD Case Number Within Each Center by 5-Case Increments Among DCD Transplants n=1,000 (9/1/2001 to 3/31/2007) |
| <a href="#">Table IV-10</a> | Annual Liver Waiting List Death Rates per 1,000 Patient Years at Risk by Status, 2003-2007   |
| <a href="#">Table IV-11</a> | Outcomes at One Year After Listing for Candidates on the Intestine Transplant Waiting List, 1998-2006                                  |

## **Chapter V: Heart Transplantation in the United States, 1998-2007**

## **Chapter VI: Lung Transplantation in the United States, 1998-2007**

|                            |  |
|----------------------------|--|
| <a href="#">Table VI-1</a> | Lung Allocation Score (LAS) Primary Diagnostic Groupings for Lung Transplant Candidates  |
| <a href="#">Table VI-2</a> | Lung Review Board (LRB) Cases Submitted, May 4, 2005-May 31, 2008  |
| <a href="#">Table VI-3</a> | Offer Number of Lung and Heart-Lung Transplant Recipients by Era and Diagnosis Group *   |
| <a href="#">Table VI-4</a> | Lung and Heart-Lung Candidates on 2/22/08 and Recipients during 5/4/2005-11/3/2007 for Patients Aged 12+ with Positive Predicted Transplant Benefit (>0 days) within 1 and 3 Years * |
| <a href="#">Table VI-5</a> | Recipient and Donor Age for Lung and Heart-Lung Transplants by Era, May 4, 2004-November 3, 2007   |

## **Chapter VII: Innovations in the Assessment of Transplant Center Performance: Implications for Quality Improvement**

|                             |  |
|-----------------------------|--|
| <a href="#">Table VII-1</a> | The number of facilities flagged and average time to flagging in the Program Specific Reports compared to methods based on one-sided and O-E CUSUMs for one-year survival in 58 liver transplant programs  |
| <a href="#">Table VII-2</a> | The number of facilities flagged and average time to flagging in the Program Specific Reports compared to methods based on one-sided and O-E CUSUMs for one-year survival in 100 kidney transplant programs  |
| <a href="#">Table VII-3</a> | Simulated Power and Average Run Length (ARL) for one-sided and O-E CUSUMs for a one-year survival, assuming a base national average one-year death rate of 13.1%*. The values of L and h and d (for the V-mask) are chosen to yield signals with probability 8% over 3.5 years for a facility of the given size operating at the national rate |
| <a href="#">Table VII-4</a> | Simulated Power and Average Run Length (ARL) for one-sided and O-E CUSUMs for a one-year survival assuming a base national average one-year death rate of 7.2%*. The values of L and h and d (for the V-mask) are chosen to yield signals with probability 8% over 3.5 years for a facility of the given size operating at the national rate   |

## **Chapter VIII: Survival Benefit-Based Deceased-Donor Liver Allocation**

|                               |  |
|-------------------------------|--|
| <a href="#">Table VIII-1</a>  | Organ Allocation Example Computing Benefit to Patient Population               |
| <a href="#">Table VIII-2</a>  | Recipient Characteristics Used in Post-transplant Mean Lifetime Prediction     |
| <a href="#">Table VIII-3</a>  | Donor Characteristics Used in Post-transplant Mean Lifetime Prediction         |
| <a href="#">Table VIII-4</a>  | Characteristics Used in Waiting List Mean Future Lifetime Prediction           |
| <a href="#">Table VIII-5</a>  | Rank Correlation Among Scores  |
| <a href="#">Table VIII-6</a>  | Rank Correlation Between Transplant Benefit and Various Other Scores           |
| <a href="#">Table VIII-7</a>  | Relative Importance of Covariates to Benefit Score                             |
| <a href="#">Table VIII-8</a>  | Rank Correlations Between Benefit Scores Using Truncation Points               |
| <a href="#">Table VIII-9</a>  | Liver Simulated Allocation Model (LSAM): Number of Deaths by Allocation System |
| <a href="#">Table VIII-10</a> | Liver Simulated Allocation Model (LSAM): Life-Years Saved by Allocation System |
