Median MELD at Transplant by 250 Nautical Mile Circles Around Liver Transplant Programs and Median PELD at Transplant Within the Nation

Updated: September 7, 2019

Median transplant scores are based on a 365-day cohort of transplant recipients that excludes Status 1A and Status 1B transplants, as well as transplants from living donors, cardiac death donors, and donors from hospitals located over 500 nautical miles from the recipient transplant hospital. These scores are updated every 180 days, and are used to assign exception scores for liver candidates on the waiting list.

Median PELD at transplant is calculated from all transplant recipients in the cohort with a PELD score, age under 12 at time of transplant.

Median MELD at transplant is calculated for each liver transplant program from all transplant recipients in the cohort with a MELD score, age 12 and older at time of transplant, from all programs within 250 nautical miles.

Table 1. Median MELD Score at Transplant Within 250 Nautical Miles of Liver Transplant Programs, Cohort of Transplant Recipients Aged 12 and Older During 09/05/2018 to 09/04/2019, Excludes Status 1 Transplants, Donors > 500 Nautical Miles Away, Living Donors, DCD Donors
