

**OPTN Policy Oversight Committee
Multiorgan Subcommittee
Meeting Minutes
October 2, 2019**

Subcommittee Chair: Nicole Turgeon, MD

Introduction

The subcommittee met via Citrix GoToMeeting on 10/2/2019 to discuss the following agenda items:

1. Multiorgan allocation

The following is a summary of the subcommittee's discussions.

1. Multiorgan allocation

Summary of discussion:

The subcommittee discussed the prior work completed on multiorgan allocation. This included the recently adopted Ethical Principles of Multiorgan Allocation. The subcommittee agreed that the next step was to perform a gap analysis between the recently adopted ethical principles and specific multiorgan combinations. This will help prioritize specific multiorgan projects.

Additionally, the subcommittee discussed which committee should sponsor the broad multiorgan project. The 2016-2017 plan endorsed by the Policy Oversight Committee called for the OPO Committee to sponsor the project with a broad multi-perspective workgroup underneath the OPO Committee. This would allow representation from the critical organ systems and constituencies. Additionally, the OPO Committee could serve as a neutral party compared to any specific organ committee. The POC subcommittee endorsed this approach.

Next steps:

Staff will share information about the criteria in the ethical principles and a gap analysis regarding specific multiorgan combinations.

Upcoming Meeting

- October 16
