There were N=236 forms that are not median score-adjusted and N=439 forms that were not reviewed due to auto-approval or withdrawal prior to decision and are not included.

Recent Public Comment Proposals

Split Liver Variance

- Changed post-public comment at OPTN Board of Directors meeting
 - Closed variance (region 8)
- Job aid to be available to help OPOs and transplant hospitals determine allocation options for the second segment when livers are split
- What you need to do
 - Complete a participation form before using variance
 - May identify one affiliated center to share with

Submit annual log of split liver procedures to OPTN

Current Public Comment Proposal

Clarification of pre-existing liver disease

- Liver candidates may qualify for Status 1A if they have fulminant hepatic failure without pre-existing liver disease
- Currently unclear whether a candidate who received a prior liver transplant could ever qualify
- Clarification will allow prior recipients who otherwise meet criteria to qualify for Status 1A
